

Testimonial

I must say that I have nothing but great praise and accolades for the Majors Home Improvement Company and their staff.

From the time Cameron visited me with his presentation briefing until the time that my patio door (the last of my window and door project) was completed, I was totally impressed and pleased.

All the staff were very professional. They answered questions that I had about the products I purchased. They gave me a date for installation and kept me abreast of the status of my order. I was also told that I could visit their factory in Milton anytime I wanted to.

The windows required that shutters be attached (Florida Law), and they were done professionally. I was given two or three options and chose the aluminum ones. They made sure that each one was marked appropriately and fit the hinges. I was also given a grid map in case I had any problems.

After installation, I was shown how the windows operated. I can definitely state that they are low maintenance. Majors guaranteed that my power bill would reduce and although that would be difficult to determine, I'm sure that it has.

The after the installation warranty has been super. I had a couple of minor issues and they were taken care of within 24 hours – very impressive.

All in all, a company I thoroughly enjoyed doing business with; a company that lived up to their claims; and a company that I have and will continue to recommend to others.

Great job.....
